THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE  
OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793  
AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVE-  
LATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS  
PROHIBITED BY LAW. THE REPRODUCTION OF THIS REPORT IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1.

Reorganization of Government Ministries for Industry

2. "The 15 September 1953 changes within the organization of the Czechoslovak Government brought in their wake a far-reaching reorganization of the industries under government control. Under the new Government, the number of ministries was largely reduced, along the Soviet pattern. The accentuated specialization which had been introduced within the Czech administration only after 1948 - also along the Soviet model - was again abandoned. Under this old organization (1948-1953), each ministry had a number of production enterprises attached to it. Now, instead of separating various specializations in the production field from one another, a consolidating system has been introduced.
3. "Many ministries, especially those dealing with economic problems, have been combined. For example, in place of two separate ministries for fuel and energy, one ministry under the heading of 'Fuel and Energy' has been established. Similarly, the previous division of different kinds of machine construction has been eliminated and one over-all Ministry for Machine-Construction has been established. Furthermore, the various branches dealing with communication problems have now been united under one Ministry for Communications.
3. "This new set-up has created a special situation. To understand this, it is necessary to examine the post-World War II industrial background in Czechoslovakia.

Background

4. "After 1946, when the concentrated nationalization drive in industry took place in Czechoslovakia, the first efforts of the State Administration were directed against

25X1

CONFIDENTIAL

SEE LAST PAGE FOR SUBJECT &amp; AREA CODES

DISTRIBUTION	STATE	ARMY	NAVY	AIR	FBI	ORR EV		
--------------	-------	------	------	-----	-----	--------	--	--

private concerns, which in numerous cases were showing vertical structure characteristics. The policies then being pursued by the government aimed at introducing a more horizontal structural system.

5. "Such reorganization was not an easy undertaking, as many concerns (for example, Skoda and Petsek-Kladno) were of such a structure that would be subject to complete disintegration in the face of too vehement a reorganization. Consequently, for this transition period various auxiliary trustee-boards were established. These trustee-boards, within a very short time, gained so much influence on industry that they came to be regarded as the real industrial managers.
6. "This new 'trustee concern' system, which had retained the traditional character of the vertical concern system, was particularly fought against during the period between 1948 and 1953. Now, since the September 1953 reform of the Government, the situation is returning to some extent to its prior structure. To state an example, a ministry such as the one for General Machine-Construction now not only heads various affiliated branches of this production-line, but also supervises various phases of such production, i.e., the raw material stage, the one-fabricated material stage, the finishing stage. Consequently, the renaissance of the vertical concern system can now be observed in Czechoslovakia.
7. "At the present time December 1953, it is not known to what extent the reorganization of the Government has already affected enterprises. However, there are still many concerns even called by their old traditional names. For example, under the Ministry for General Machine-Construction, the Skoda concern (official name: Leninove Zavody) is still known by this name. Auto-Praha, Motor-Milno, Pal and Karon (all involved in truck and car production) are listed as affiliated with the Skoda concern. Furthermore, the CKD (pre-World War II Bohemian-German concern) is still cited as being under the control of the Skoda concern. CKD specializes in heavy industry and mining equipment. Another group mentioned as being under Skoda control is the newly-created Stredoslovenske Strojarni, located in Slovakia and producing heavy equipment.
8. "The traditional Kladno and Vitkovice groups are listed under the Ministry for Metal Pits, Steel Mills and Foundries.
9. "Activity in the works coming under the new Slovakian Huko group, the organization of which was begun last year 1953, is proceeding at a rather idle pace but has not been completely halted. This Slovakian Huko group is of vital importance within the newly-organized Ministry for Metal Pits, Steel Mills and Foundries as it still has under its control the iron ore pits in Eastern Slovakia (the only iron ore extraction area in all of Czechoslovakia). Last year this iron ore basin was prepared to supply the Huko steel mill. Huge stocks of iron ore had already been piled up. According to information I have received, approximately 15,000 to 16,000 miners are under employment in the pits. Although this iron ore is of rather poor quality (only 48% in the heat shafts at Smolnik), these large stocks will have to be used. Source is not sure of the accuracy of this percentage figure. It is not known which steel mill in western Czechoslovakia will be supplied with this iron ore. It is rumored that the Slovakian economic trustees within the so-called Slovakian 'autonomous government' are hesitating to surrender this Slovakian treasure to Czech foundries.
10. "The new organization has resulted in another type of confusion from the following point of view. A new ministry for so-called 'Local Industry' has been created. There are no indications available as to what kind of industries have been attached to this new type of ministry. According to information I obtained from a recent Czech refugee and to what I have been able to gather from the Czechoslovak press, it can be assumed that this newly-established ministry is responsible for:
  - (a) enterprises supplying products for strictly local consumption (for example, small flour mills, smaller sized brick factories and small saw mills);
  - (b) the new so-called 'side line' production (for which a new drive has set in recently) which has been added to the normal production of nearly all larger industrial enterprises.

CONFIDENTIAL

25X1

11. "The question of 'side line' production is dealt with by the Ministry for Local Industry in cooperation with another ministry, the so-called 'Ministry for Special Economic Tasks'. Reliable people have described the conception of side line production and the reasons behind this idea as follows:
  - (a) the production-means industry has, to some extent, reached a satisfactory level;
  - (b) the equipment necessary in this branch of the industry has been set up;
  - (c) the production-means industry can switch at a given moment to whatever production is demanded (for example, war-material production);
  - (d) it is wished that the factories be kept in operation at the present time so that constant control over the machinery and manpower may be maintained. At the moment war production does not employ them to their full capacity, with the result that it is necessary for them to perform some other work in the meantime [hence, side line production].
12. "This side line production conception, camouflaged as 'supplying the consumer market', is now being introduced in all the Satellite countries. Thus the Soviet system maintains its enterprises at a high peak of vitality, ready to switch at a moment's notice into the necessary production.

List of Main Enterprises falling under Each Ministry

13. "In the following paragraphs I am going to list the key industries of Czechoslovakia, the Ministries supervising them, the divisions of the Ministries under which they fall, their geographical locations, their production, their approximate number of employees, their trusts, and, in a few cases, some descriptive remarks:  
Ministry for Fuel and Energy: Minister: Josef Jonas (15 September 1953)
  14. "The Ministry for Fuel and Energy, besides absorbing the old Ministry for Fuel and the old Ministry for Energy, also took over, along with the supervision of the very complicated coal mine machinery, the supervision of power plant machinery. In line with the Five Year Plan, the main accent in regard to electricity is no longer based on coal power plants but on hydroelectric plants.
  15. "Two huge [hydroelectric] systems are now under construction, one on the Vltava River (German: Moldau) in Bohemia and the second on the Orava and Valh Rivers in Slovakia.
  16. "The largest project within this program is now under construction near Blatná. (The Plan foresees that it will be finished on 1 May 1954.) The Blatná dam has already been built, thus being the third on the Vltava River, south of Prague. The two dams constructed prior to this one are situated in Vraná and Stachovice. The project contemplates the construction of four more dams, in: Orlik, Mlýnská, Krumlov [Kasky Krumlov] and Lipno [sic]. In Lipno, works are in their starting phase. Each of the seven projected dams will be equipped with special gigantic water-lifts [lozky] enabling navigation on the Vltava River to as far as G. Budojovice [Kasky Budojovice].
  17. "A huge dam with a power plant on the Orava River is under construction about three kilometers south of the small locality of Ustí. The power plant deriving its power from this dam will be supplying power to the newly-constructed industrial centers in the north of Slovakia and also to the electrical railway segment between Žilina and Poprad.
  18. "The Orava power plant will be equipped with three water-turbines with, it is said, 12,000 HP each.
  19. "The third hydroelectric project now under construction is on the Svratka River, north of Brno, in Vlt. Construction of this project was started as early as 1947 and, according to rumours, will be finished next year [1954]. The power plant will be operated along the lines of the one on the Orava River, i.e., with three water-turbines of 12,000 HP each.

CONFIDENTIAL

25X1

CONFIDENTIAL

20. "It is not yet completely clear whether the industry for electrical machinery will fall under the Ministry for Fuel and Energy. This would affect primarily the MPZ concern (Moravské Elektro-Montážní Zavody). This plant concern is comprised of at least nine huge plants, employing over 30,000 people. A good number of auxiliary enterprises also belong to it. Within the framework of the former organization set up by the Czechoslovak government, this concern--or group--was under the ministry for machine construction in general. Because of the amalgamation of this ministry with another ministry, the Ministry for Heavy Machine Construction, it might be possible that some of its very specialized branches will be separated and assigned to other more competent administrative branches. It is safe to say that various branches will be taken over by the newly-formed Ministry for General Machine Construction, but certain reorganization seems to be inevitable.

21. "The following enterprises come under the Ministry for Fuel and Energy:

Division: Fuel

Sub-Division: Coal

Trust: Ostravsko Karvinske Doly (Hlozbyt)

(a) Enterprise: Ostravsko Karvinske Doly-Sever

Location : Ostrava; Production: Coal and coke. Approximate Number of Workers: 80,000

Remarks: Managing Board: Mor. Ostrava Dimitrova Street.

(b) Enterprise: Ostravsko Karvinske Doly-Jih

Location : Ostrava; Production: Coal and coke. Approximate Number of Workers: 80,000

(c) Enterprise: Karvinske Doly

Location : Karvina; Production: Coal and coke; Approximate Number of Workers: "

Trust: Stredoceske Kamenouhelne Doly  
(formerly: "Hankar Kutni")

(d) Enterprise: Kovarske Uhli

Location : Kladno; Production: Coal and coke; Approximate Number of Workers: 20,000

Remarks : Managing Board: Praha II, S. J. Street.

Trust: Rosice

(e) Enterprise: Rosicke Doly

Location : Rosice; Production: Coal; Approximate Number of Workers: 5000.

Division: Fuel

Sub-Division: Lignite (Brown Coal)

Trust: Most

(f) Enterprise: Severoceske  
Kamenouhelne Doly

Location : Most; Production: Lignite; Approximate Number of Workers: 30,000

(g) Enterprise: Zapadoceske  
Kamenouhelne Doly

Location : Sokolovo /not in NIS Gazetteer for Czechoslovakia/; Production: Lignite  
Briquettes; Approximate Number of Workers: 10,000

Division: Mines

Sub-Division: Uranium, Silver & Lead

Trust: Jachymov

(a) Enterprise: Pribram

Location : Pribram; Production: Silver, Uranium; Approximate No. of Workers: 800  
Milin

(b) Enterprise: Stribro

Location : Stribro  
Mlikov [not in NIS Gazetteer for Czechoslovakia]; Production: Silver,  
Uranium; Approximate Number of Workers: 800

Division: Steel Mills & Foundries

Sub-Division: Pig Iron & Steel

Trust: Kladno (formerly  
Petsek & Co.)

(a) Enterprise: Spojene Ocelarny

Location : Kladno; Production: steel mill; Approximate No. of Workers: 8000

(b) Enterprise: Nucicke Zelezarny [Contact has placed a question mark next to this name.]

Location : Nucice [Note by Contact: 'possibly in Pilsen']; Production: Metal-  
lurgical plant; Approximate Number of Workers: 1800

(c) Enterprise: Chomutovske Zelezarny

Location : Chomutov; Production: Mannesmann tubes; Approx. No. of Workers: 4000  
Location : Slovakia (exact location not known) [Note by Contact: Podbrezova]  
Production: Mannesmann tubes; Remarks: Under construction.

Trust: Vitkovice

(a) Enterprise: Vitkovicke Zelezarny

Location : Moravska Ostrava; Production: Steel mill & steel constructions;  
Approximate Number of Workers: 30,000; Remarks: Output: 1,200,000 t;  
five blast-furnaces

(b) Enterprise: Zelezarny 'Molotova'

Location : Trinec; Production: Steel mill & steel constructions & narrow-gauge  
railway construction; Approximate Number of Workers: 10,000;  
Remarks: Output: 500,000 t

(c) Enterprise: Nove Hute Klem. Gottwalda (under construction)

Location : Kuncice; Production: Steel mill & steel constructions; Approximate  
Number of Workers: 35,000; Remarks: 1,800,000 t; three blast-  
furnaces in operation.

(d) Enterprise: Vitkovicke Zelezarny

Location : Moravska Budajovice; Production: Screws; Approximate Number of  
Workers: 4000

Location : Brnoslatina [not in NIS Gazeteer for Czechoslovakia];  
Production: boilers; Approximate Number of Workers: 3000

Trust: Huko (Kosice-  
Slovakia)

(a) Enterprise: 'Huko' [Note by Contact: 'closed at beginning of 1953'.]

Location : Kosice; Production: Steel mill; Approximate Number of Workers: 35,000;  
Remarks: New. Planned output: 1,500,000 t. Construction partly postponed.

(b) Enterprise: Zelezarny

Location : Brezno; Production: Steel mill; Approximate Number of Workers: 3000

Division: Steel Mills & Foundries

Sub-Division: Copper

Trust: Kablo

(a) Enterprise: 'Kablo'

Location : Kladno; Production: Copper-rolling plant; Approximate Number of Workers: 8000

(b) Enterprise: 'Kablo'

Location : Bratislava; Production: Copper-rolling plant; Approximate Number of Workers: 10,000

Division: Steel Mills & Foundries

Sub-Division: Aluminium

Trust: Zbrojovka Povazska  
Bystrica

(a) Enterprise: Novohutis

Location : Decin :  
Poorly [not in NIS Gazeteer for Czechoslovakia]; near Usti Nad Labem  
Povazska Bystrica (Slovakia); Production: [not indicated];  
Approximate Number of Workers: [not indicated]; Remarks: New.

Trust: Vitkovice

(a) Enterprise: Vitkovické Zelezarny

Location : Rymarov; Production: [not indicated]; Approximate Number of Workers: 900

Division: Steel Mills & Foundries

Sub-Division: Equipment for Furnaces

Trust: Teplotchna

(a) Enterprise: [not indicated]

Location : Usti Nad Labem; Production: Equipment for furnaces;  
Approximate Number of Workers: 3500

23. "The following enterprises come under the Ministry for Machine Production:

Ministry for Machine Production: Minister: Karel Polacek (15 September 1953)

Division: [not indicated]

Sub-Division: Cars & Trucks, Cranes & Heavy Equipment, Armament

Trust: Leninove Zavody (formerly: Skoda)

Skoda

(a) Enterprise: Skoda-Leninove Zavody

Location : Pilsen; Production: guns, tanks, engines, machines for industries;  
Approximate Number of Workers: 25,000; Remarks: Partly under  
military control.

(b) Enterprise: Skoda

Location : Kynovice [not in NIS Gazetteer for Czechoslovakia];  
Production: trucks; Approximate Number of Workers: 800

(c) Enterprise: Automobilova Zavody

Location : Mlada Boleslav; Production: cars & Tudor trucks; Approximate  
Number of Workers: 4500

(d) Enterprise: Skoda

Location : Hradec Kralove; Production: Harbor cranes & bridge constructions;  
Approximate Number of Workers: 4000

(e) Enterprise: Skoda

Location : Unicov; production: machine building; Approximate Number of  
Workers: [not indicated]; Remarks: New.

(f) Enterprise: Skoda

Location : Chabarovice; Production: casts & moulds; Approximation of  
Workers: [not indicated]

(g) Enterprise: Skoda

Location : Loucka; Production: machine building; Approximate Number of  
Workers: 1000

(h) Enterprise: Skoda

Location : Adamov; Production: guns, grenades, shells; Approximate Number of  
Workers: 3000; Remarks: under military control.
